

Your one-click distribution solution. Instant broker or direct portals, each backed by a real-time API, to seamlessly apply, quote, and bind. Just customize theme and launch.

 **Unlimited stores for any distribution**

Create a single store for all your products. Or, create stores for specific customers, programs, or markets. Choose a user-facing portal, or connect to third-party exchanges through APIs. Jōshu gives you the flexibility to move at the speed of business.

 **Automatic quotes**

Streamline your quoting process and increase customer satisfaction with instant quotes. Jōshu also supports automatic declines, or referrals to underwriters for review. The whole underwriting process is self-contained in one simple system.

 **Seamless customer experience**

Don't reinvent the wheel. With Jōshu, there's nothing to build, nothing to install. You get a branded, modern Apply/Quote/Bind workflow that saves time and reduces errors. All without waiting in line for others to build it or make changes to an existing website.

 **Instant bind**

When you enable automatic binds, we instantly deliver the policy and relevant documents. Brokers love the speed, and underwriters are free to work on cases that need review. Still want some oversight? There are plenty of options for underwriter review.
